Bosch AL9964SB Long Haul Alternator

Bosch Long Haul Alternators are revolutionizing the Commercial Vehicle industry with high output technology that delivers maximum charging power. With 275 amps Max output, and an amazing 210 amps at engine idle, this alternator stands up under all operating conditions

3-Year Warranty

Bosch backs the AL9964SB with a 36 month 350,000 mile warranty!

Battery Sense

Signals alternator to increase output to battery. Compensates for voltage drops, ensures maximum state of charge of battery.

Advanced Performance Technology

The Bosch AL9964SB represents the next generation of commercial vehicle charging technology, delivering more

power and greater output at engine idle than competitive alternators. Bosch’s 210 amp charge rate at idle helps maximize battery life by reducing battery deep cycling.

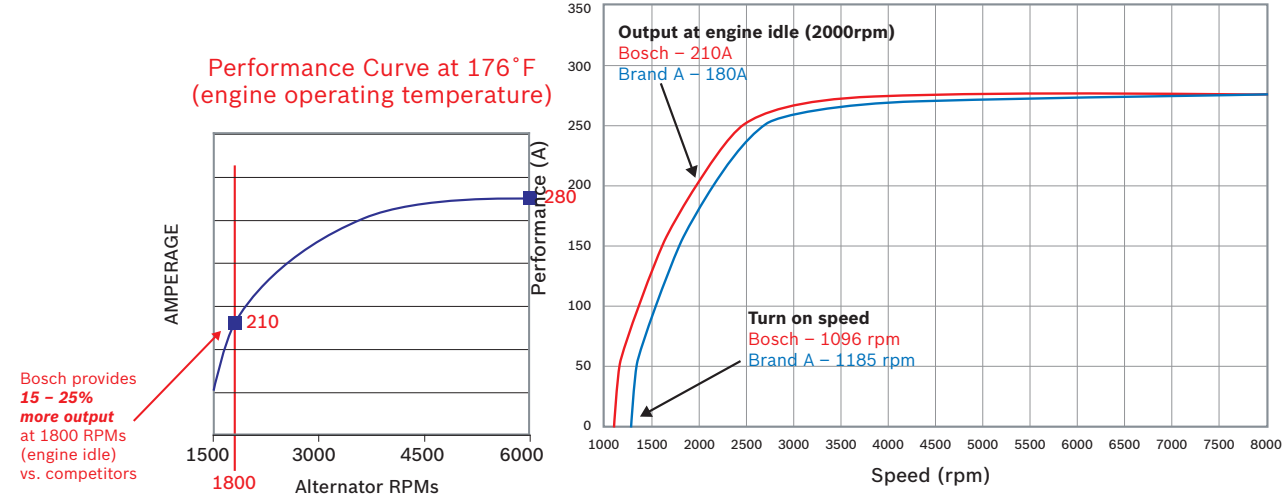

Built For the Long Haul

It’s all about keeping commercial vehicles on the road. When they’re not rolling, time and money are lost. The increased electrical loads placed on commercial vehicles, demand power and lots of it. That’s why you should always choose Bosch Long Haul products.

Temperature Protection

Protects the alternator electronics against short but extreme temperature spikes. This prevents premature failure by providing current while reducing voltage to cool the electronic components.
